Professional Summary

Computer Engineering student (CGPA 8.96) with proven experience building and deploying full-stack AI-powered applications using React, Node.js, FastAPI, and MongoDB. Skilled in real-time systems, LLM integration (Gemini AI), and REST API design. Consistently recognized as department topper with strong DSA foundations.

Education

PES Institute of Technology & Management, Shivamogga

2023 – 2027

B.E. in Computer Engineering | CGPA: 8.96 (till 5th Semester)

Projects

CivicPulse | *React, FastAPI, MongoDB, Gemini AI, Retell AI, Leaflet.js, JWT*

- Built a real-time civic issue reporting platform with 3-role JWT authentication (citizen, official, supervisor), SLA-based auto-escalation, and public transparency dashboard.
- Integrated Gemini AI for automatic complaint categorization across 8 categories achieving 90% accuracy, eliminating manual form selection entirely.
- Engineered AI fake resolution detector and Retell AI voice agent for multilingual complaint filing — deployed on Vercel with 28+ live seeded issues.

Coderift | *React, Node.js, Socket.io, MongoDB, Monaco Editor, Gemini AI, Judge0 API*

- Engineered a real-time collaborative code editor supporting 10+ languages with WebSocket-based live sync, cursor tracking, and shared room sessions via Socket.io.
- Integrated Monaco Editor (VS Code engine) with Judge0 API for in-browser code execution and Gemini AI for automated code review and bug detection.
- Deployed full-stack application on Vercel and Render with MongoDB Atlas; shortlisted in ZYNEX National Hackathon Round 1 (2026).

Indian House Price Prediction | *Python, Scikit-learn, Pandas, NumPy, Matplotlib*

- Built ML regression pipeline on 13,000+ housing records with feature engineering, outlier removal, and comparison of Linear, Ridge, and Random Forest models.
- Visualized price distributions and location-wise trends using Matplotlib and Seaborn; achieved optimized prediction accuracy through hyperparameter tuning.

Technical Skills

Languages: Java, Python, JavaScript, C, C++

Frontend: React, Tailwind CSS, HTML, CSS

Backend: Node.js, FastAPI, Spring Boot, REST APIs, Socket.io

AI/ML: Gemini AI, Scikit-learn, Pandas, NumPy, Prompt Engineering

Database: MongoDB, MySQL

Tools: Git, Postman, VS Code, Vercel, Render, MongoDB Atlas

Cloud: AWS (Cloud Architecting, Operations, Security, Developing)

Certifications & Leadership

- Gold Medal – Department Topper, PESITM (2023–2024).
- Letter of Recommendation – GeeksforGeeks, Campus Mantri Program.
- AWS Academy: Cloud Architecting | Cloud Operations | Cloud Developing | Cloud Security Foundations | Cloud Foundations.
- NPTEL: Introduction to Large Language Models | Foundations of Deep Learning | Blockchain & Applications | C++ Programming.
- Google Foundations of Cybersecurity.
